Download this free upgrade now! [Firmware Upgrade]

**Updates and Changes made in this release:**

NEW:

- **Czech Menu Language**

- **Meets official XviD consumer electronics certification "Level One - XviD Home Profile"**
  (Does not support GMC or Qpel)

- **Interactive Playlist for music, video and pictures**

Select: Press right arrow button to select and deselect files.
Play: Press Play ALL or Shuffle button to play selected files in current folder.

- **Folder for background music during slideshow can be selected on TV screen**

Select: Press right arrow button to select and deselect a certain audio folder.
*Background Music: Supports MP3 files with a bit rate up to 128kbps.*
Play: Go to your Pictures folder and press Play ALL or Shuffle to start the slideshow.

- **Scalable subtitles (SUB, SRT, SMI) for DivX and XviD movies**

1. Press the subtitle position button on your remote control.
2. Press the right/left arrow buttons to increase/decrease the font size.
3. Press the up/down arrow buttons to move the subtitle position if required.
4. Press the subtitle position button once more to confirm the new size.

- **Automatic video playback on boot up**

Folder: Create a folder in the root directory called "Autoboot" and store some MPEG or AVI video files in it.
Playback: Files will playback automatically when the unit is turned on and play continuously until stopped manually via remote control.
