3. Use the supplied template as a guide to cut the proper diameter mounting holes. Use the template or mounting ring to mark the locations for the mounting screws and drill the holes with a 1/8" diameter bit.

Fig. 1- Door installation

Fig. 2- Rear Deck installation

4. Feed the speaker wires through the openings and mounting rings, and connect them to the speaker terminals. Make sure you maintain the correct polarity. If you need to run new wiring, the supplied speaker wire is marked to help you maintain correct polarity when making connections. The terminals at one end of the speaker wire are coded by size to match the speaker terminals. Just push the connectors onto the matching terminals.
5. Fit the mounting rings and speakers to the cut-outs, and mount with the supplied screws and clips. Apply a small amount of the grille adhesive at 4 or more points around the edges of the grilles and carefully, but firmly, press the grilles into place.
